Aamodt Strategic, LLC provides structured IT and cybersecurity support for organizations that need reliable execution, clear communication, and practical improvement. Work is organized around secure operations, compliance readiness, vendor coordination, tooling discipline, documentation, and maintainable handoff.

CORE CAPABILITIES

- IT operations support, technical troubleshooting, and user support
- Cybersecurity support for users, systems, data, access, and controls
- Infrastructure coordination across cloud, endpoints, identity, and networks
- Microsoft 365, identity, endpoint, and access administration support
- Governance documentation, runbooks, procedures, and operating materials
- Compliance readiness support for evidence, control tracking, workflow automation, reporting, and intake process improvement

OPERATIONAL EFFICIENCY

- Drove organizational operations costs down 70% while increasing operational efficiency
- Streamlined operations by reducing unnecessary external vendor dependency
- Built vendor relationships around scope, accountability, response, and cost control
- Right-sized tooling against actual operating needs instead of buying complexity
- Audited tool sprawl to identify overlap, unused licenses, and consolidation opportunities
- Maximized internal processes, ownership, and repeatable support workflows

DELIVERY FOCUS

- Define requirements, decision path, operating constraints, and success measures
- Align technical work to risk, continuity, cybersecurity, and documentation needs
- Communicate clearly through scoped delivery, status cadence, and closeout notes
- Leave maintainable records, procedures, handoff material, and support references
- Support practical automation where recurring work can be faster and more consistent

RELEVANT EXPERIENCE

- MSP IT operations, infrastructure support, and service delivery coordination
- Microsoft 365, identity, endpoint administration, access, and security controls
- Information management, communications operations, and security-oriented workflows
- Vendor coordination, technology rationalization, and operational cost control
- Documentation-first execution for requirements, handoff, continuity, and evidence support
